Hello Charmaine

As per our discussion earlier today just a quick recap of what we discussed:

- Replacing the word Disabilities with Disability throughout the document.
- Outcome 7 Employment: People with disability have the same opportunities as other people to obtain and maintain employment within a public authority.
 - Any DAIP that is not due to be reviewed until after the proclamation of the amended legislation will be required to incorporate Outcome 7 activities into their next DAIP review. The proclamation is expected before the start of the 2013-2014 financial year.
- Discussion about including more detail into action plan of the DAIP, although like you mentioned if the Implementation Plan is made available to the public this will be sufficient.
- Discussion about including the wording and reference around “emerging technology” (use of electronic books ect) in the improve access to the information in the library strategy.

Overall congratulations for a job well done with the draft DAIP. Please contact me if you require any further information or assistance with the DAIP development.

Regards,

Brett.
